

**6th Annual Conference  
Brought to you Virtually**

**January 27-28, 2021**

**Co-opting Convention...**

We live in curious times, where conventional healthcare is failing as many Americans with compromised immune systems struggle with both the impact of underlying health conditions, and the potential risks associated with a worldwide pandemic. And yet, we know there are solutions to shoring up one's immune system. *Let's co-opt the conventional healthcare system and teach people how to supplement their nutritional health.*

The dietary supplement supply chain is under constant strain from international travel restrictions, shipping backlogs, worker shortages and the impact of increased demand. *Let's co-opt these problems and collectively work to establish pathways that protect consumer interest and demand for quality, traceability and continual quality improvement in the products they have come to trust.*

You could say our world has been on fire. We are learning lessons about the disenfranchised members of our society and staring at the face of historical wounds that both inflict pain and damage one's health status. Health is not just about insulin levels and heart rates, it includes the long term effect of stress, income inequity and lost opportunity. We know health disparities among Black and Brown Americans have a crippling impact on society. *Let's co-opt the status quo, diversify our workforce and commit to meaningful strategies for improving the health status of those truly in need.*

In the words of Charles de Gaulle, "Politics is too serious a matter to be left to the politicians." If things are to change, we must be a part of that process, and do so without the trappings of the past or any delusion of the future. *Let's co-opt political strongholds by creating new alliances that reflect the standards and intentions of our Association.*

Join us in conversation and collaboration about how things can be.
